

# **EcoQuilt** **65**<sup>TM</sup>

*Our Highest Performing Multi Purpose Insulation Roll*

**Fitting and Informational Data Sheet**

# EcoQuilt **65**™

EcoQuilt65 Insulation is thermally the highest performing Multifoil Insulation product in our range and can be used in a massive range of applications.

It boasts exceptional thermal benefits, whilst acting as a high performing vapour control barrier.

EcoQuilt65 Insulation comprises of 19 layers and is 65mm thick. The layers consist of recycled loft quilt, reflective PET and reinforced heavy duty laminated foil outer layers.

## 3-in-1 Insulation, Vapour Control and Radiant Barrier

### Product Dimensions

|           |        |
|-----------|--------|
| Thickness | 65mm   |
| Length    | 10m    |
| Width     | 1500mm |
| Weight    | 15kg   |

### Product Performance

|               |      |
|---------------|------|
| Core R-Value  | 2.04 |
| Roof R-Value  | 2.94 |
| Wall R-Value  | 3.38 |
| Floor R-Value | 4.73 |

# EcoQuilt 65<sup>TM</sup>

Safe, Quick & Easy To Install

Reflects 95% of Radiant Energy

Built In Vapour Control Layer

Equivalent to 90mm PIR Board

## KEY FEATURES

- ✓ Comprises of 19 Layers and is 65mm Thick. The Layers Consist of Recycled Wadding, Reflective PET and Reinforced Heavy Duty Foil Outer Layers.
- ✓ Effectively Reflects Back Heat During the Winter and Excess Heat Away During the Summer, Creating a More Ambient Temperature All Year Round.
- ✓ Requires No PPE and Produces Minimal Wastage, Unlike Traditional Materials Such as PIR Insulation and Glass Fibre.
- ✓ Suitable for Roofs, Walls, Floors, Timber Frames, Loft Spaces, Conservatories And Many More Applications.
